

Rotational Reverse Plating Plant RNB 3-250/1-2-001

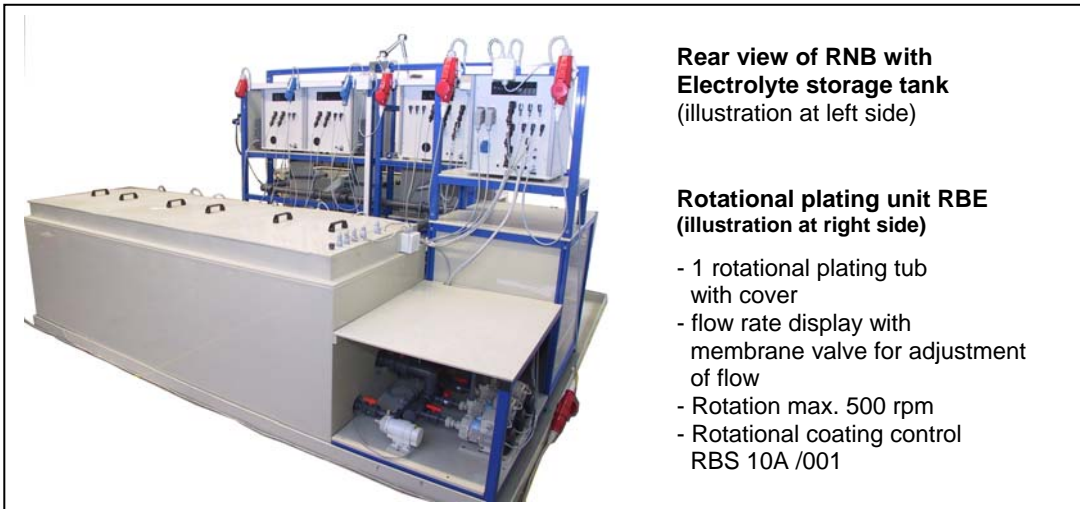

Rotational Reverse Plating Plant RNB 3-250/1-2-001

- 1 Rotational plating station
- 2 thick nickel stations
- Storage tank for 1400 l nickel sulfamate electrolyte
- Automatic electrolyte stabilisation
- Permanent selective cleaning

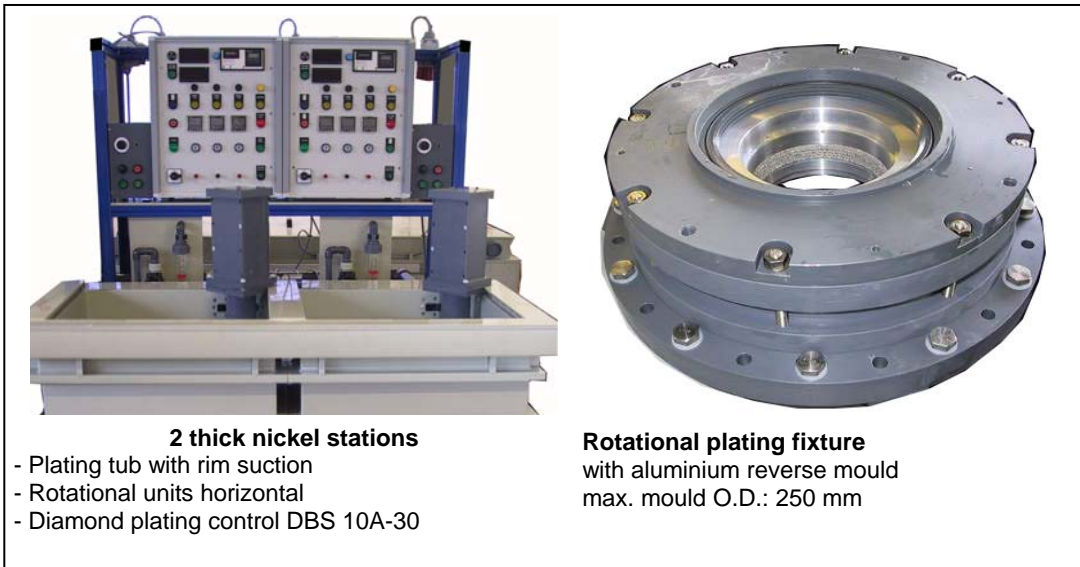

Dressing roller

Rear view of RNB with Electrolyte storage tank (illustration at left side)

Rotational plating unit RBE (illustration at right side)

- 1 rotational plating tub with cover
- flow rate display with membrane valve for adjustment of flow
- Rotation max. 500 rpm
- Rotational coating control RBS 10A /001

2 thick nickel stations

- Plating tub with rim suction
- Rotational units horizontal
- Diamond plating control DBS 10A-30

Rotational plating fixture with aluminium reverse mould max. mould O.D.: 250 mm

Anode system
